Project Description :

DEUTSCHE ROHSTOFF AG (DRAG) is a german mining company with an aggressive exploration program in Germany and other european countries and a focus on well explored properties, which can be turned into production in due course. DRAG was able to secure some of the most prospective exploration targets in Germany during 2006 / 2007 and is now doing systematic follow up work on its properties.

Mineral & Exploration – Dr. Krassmann served as senior mining & geology consultant for DRAG during 2007 – 2009, being involved in a multitude of exploration and management duties in central and eastern Europe as well as in Cyprus. One of the major projects was the planning and management of the Gütting gold exploration program in northeastern Bavaria in late 2008.
